SMALLBIZSEO PERFORMANCE AUDIT & CASE STUDY

VERIFIED SEO PERFORMANCE CASE STUDY

MIAMI ARBORISTS & LANDSCALPERS

Dominating local tree care, removal, and maintenance search queries.

Audit Date: **January 2026** Core Location: **Miami, Florida**

EXECUTIVE GROWTH SUMMARY

SmallBizSEO partnered with Miami Arborists & Landscalpers to analyze and expand their localized search index presence in the active Miami, Florida territory. Prior to the optimization program, they suffered from low keyword exposure rates and high budget drain on inefficient paid advertisements. SmallBizSEO executed an end-to-end local SEO campaign. By designing mobile-optimized landing architectures, rectifying critical technical crawler issues, and standardizing structural metadata schema, we successfully drove the business into high-authority search placements. This has not only boosted physical foot traffic and service calls but has established permanent organic equity and authority in their service domain.

CRITICAL TECHNICAL CRAWL DEFICITS

- ! CRITICAL CRAWLABILITY: Discovered multiple broken canonical links and missing sitemap indices, hindering search engine crawling.
- ! LOCALIZED SCHEMA DEFICIT: Absolutely zero local business structured data schema markup was present, meaning Google failed to align the business coordinates to hyper-local maps categories.
- ! MOBILE CORE WEB VITALS DUBNESS: Sluggish mobile page loading speed (LCP over 4.5s) caused by heavy, uncompressed media files and unminified Javascript.
- ! METADATA DUPLICATION: Critical service page titles and heading tags (H1-H3) were identical, confusing google's intent crawlers and causing keyword cannibalization.
